Date: June 18, 2026

E-Signature: Alp Hacioglu

Time Card

- June 10, 2026 – 1 hour

  Read the ZyBooks API materials and researched possible APIs for the project.

- June 13, 2026 – 2 hours

  Selected the NHTSA Vehicle API and developed the Python program.

- June 17, 2026 – 2 hours

  Tested the program, fixed errors, added input validation, and reviewed the final code.

- June 18, 2026 – 1 hour

  Prepared the project document and added sample output screenshots.

Total Time: 6 Hours

Sample Output

The screenshot below shows the program successfully retrieving vehicle model information from the NHTSA API.

Invalid Input Handling

The program also validates user input and displays an error message when a blank value is entered.
